# Statistics - CFF by CFF

	Avg. Deviation (rounded to 3 sig. figs for readability)		
Angle	REH	REE	REHTILDE
Baseline	2.68	27.3	3.68
Reduced-Phi	5.63	42.4	4.10
Even-Phi	4.52	36.1	3.63

*NOTE: Relatively little information loss from reduced angle compared to other CFFs. Interesting how REHTILDE predictions for even-phi were slightly better than baseline.*
