Videos from Online Sources

If you want to add videos to Audio-Video from online sources, you should find a way to download the video – we have a guide for Facebook videos below. If you can't download the video, you can usually **embed** the content in Mandala. Since you can't embed content in Audio-Video, you'll need to use another Mandala tool: Visuals in Mandala. Check out Add a Video to Visuals for help on embedding videos using the Mandala Visuals. Unfortunately, you won't be able to house videos made with Visuals in Audio-Video.
