Use Sources as Citations in Mandala Tools

You can use Sources citations in other Mandala tools. This lets you quickly create bibliographies and citations in any WYSIWYG editor.

A **WYSIWYG** editor, or "what you see is what you get" editor, lets you add styling to your text without special code or markup. The Mandala WYSIWYG editor also lets you embed assets from other Mandala tools using the icon in the toolbar. WYSIWYG editors have a large area for adding text and a toolbar. For example, "Description" fields usually use WYSIWYG editors.

Make sure to add a source before starting the steps below.

- Add a Citation to an Asset
- Add a Citation to a Collection Description
