

Add a Video from Facebook

This trick lets you download Facebook videos. You can then save them to the Audio-Video archive. We're assuming you already have a Facebook account.

1. Log in to Facebook at www.facebook.com
2. Find a useful video
 - If you need news videos of current events, try the NBC and CBS local news pages
3. Right-click on the video
 - You'll see a popup menu open on the video
4. Click **Show video URL** from the menu
 - A box with the URL for the video will open
5. Copy the video's URL
6. Replace the "www" in the URL with "m"
 - Before: https://www.facebook.com/pg/Newsplex/videos/?ref=page_internal&mt_nav=1
 - After: https://m.facebook.com/pg/Newsplex/videos/?ref=page_internal&mt_nav=1
 - Your video will open in mobile format; this makes it easier to download
7. Right click on the video, then click **Save Video as...**
 - Your computer's file browser will open
8. Save it to your computer with a more descriptive filename
 - Instead of: "18233350_502411666778273_318503023640838144_n"
 - Try: "CBS raw Emancipation Park.8.12.17"
9. [Add the video to Mandala Audio-Video](#)
 - See the [Upload a Video File](#) guide for help
