

Use Mandala Assets in Visuals

You can add assets from other Mandala tools in any rich text field in Visuals. These fields include:

- Descriptions for assets
- Overviews for collections

Click the  in the toolbar for these fields to access the importer. For more details, see the instructions below.

1. Create or edit a collection or visualization
 - Learn more about [adding collections](#), [adding visualizations](#), and [editing visualisations](#)
2. Find a rich text editor field
 - Rich text editors include a toolbar and a large space for editing text
 - "Description" fields usually use rich text
3. Place your cursor where you want to insert the Mandala asset
4. Click on the  Mandala icon in the toolbar
 - The "Add Mandala Resource" window will open
5. Switch the "Type" to the type of asset you want to add
 - You can find the "Type" drop-down field in the top right corner
 - A list of assets will appear
6. To use a asset you created, enter your computing id in the "Show only from user" field
 - A list of your assets will appear
7. Use the other fields as needed to find the asset you want
8. Click on the asset you want to add
 - The asset will turn green
 - You'll see an excerpt of the source to the right
9. Click **Add item**
 - The window will close
 - You'll see the asset in the editor
10. Repeat this process to add more assets
11. **Save** the visualization or collection when you're done
