Sources (definition)

Sources in Mandala helps you collect, organize, cite, and share your research sources. You can form groups to share citations and notes with other members. Faculty and graduate students who want to keep their citations organized, keep their bibliographies in sync with several users, and share their bibliographies with colleagues will find this tool particularly useful.

Unlike other citation managers like Zotero, Sources lets you connect citations to other items in Mandala. To do this, you can use special labels called Knowledge Maps that group related items.
