

Scatter Chart

Spreadsheet Format

Each row represents data points with a shared x-axis value.

	Column 1	Column 2	Column 3 (and beyond...)
Data Types	number	number	number
Contents	The x-axis value of the data point.	The y-axis value of the data point.	The y-axis value of a second data point (with the same x-axis as Column 1). This column adds an extra data set on the chart. Note: You can have as many additional columns as you need. Each column adds a new set of y-axis values.
Required	x	x
