Join Related Resources

In Mandala, you can use Knowledge Maps to connect related resources. To do this, you label your resources in each tool. The resource will then show up under Subjects, Places, and Terms.

This guide shows you how to add Knowledge Maps to each type of asset. We assume that you've already made your entries: if you haven't, learn more at Create Content.

In Audio-Video

Metadata fields where you can add Places: Referenced Places, Recording Location

Metadate fields where you can add Subjects: **Subject** Metadate fields where you can add Terms: **Terms**
